TERMS AND CONDITIONS OF SALE/WARRANTY

ACKNOWLEDGEMENT OF ORDER AND TERMS AND CONDITIONS OF SALE

This is to acknowledge receipt of your ("Buyer") purchase order for the specified ARCHITECTURAL CONTROL SYSTEMS, INCORPORATED ("Seller") products (the "Products") and to set forth the terms and conditions ("Terms and Conditions") of sale for this order. If the Terms and Conditions of this acknowledgment differ in any way from the terms and conditions of Buyer's order, this acknowledgment shall be construed as a counteroffer and shall not be effective as an acceptance of such order unless Buyer assents to the Terms and Conditions contained herein, which shall constitute the entire agreement (the "Agreement") between the parties. Buyer's assent to the Terms and Conditions or a contained herein shall be deemed given upon Buyer's execution of this acknowledgment below or upon Buyer's failure to object to these Terms and Conditions in writing within ten (10) days from the date of receipt of this acknowledgment. Buyer's receipt of delivery of the Products without immediate return will further manifest Buyer's assent to these Terms and Conditions. No additions to or modifications of any of the Ferms and Conditions have small in writing and signed by both parties.

- 1. TAXES: Any tax or governmental charge (or increase in same) affecting Seller's costs of production, sale, or delivery shall be for Buyer's account and shall be added to the price and shall not be subject to any discount.
- 2. MINIMUM ORDER CHARGE: The minimum invoice amount will be \$50.00. An order with a net value of less than \$50.00 will be invoiced at \$50.00.
- 3. TERMS OF PAYMENT: Terms are net thirty (30) days from the date of Seller's invoice in U.S. currency. Seller shall have the right, among other remedies, either to terminate this Agreement or to suspend further performance under this and/or other agreements with Buyer in the event Buyer fails to make any payment when due. Buyer shall be liable for all costs and expenses, including reasonable autorneys' fees, relating to the collection of past due amounts. If any payment owed to Seller is not paid when due, it shall bear interest at the maximum rate allowed by law from the date on which it is due until it is paid. Should Buyer's financial situation and/or capabilities become unsatisfactory to Seller in its sole discretion, cash payments or security satisfactory to Seller may be required by Seller for future deliveries and for the Products theretofore delivered.
- 4. BACK CHARGES: Seller is not responsible for, and will not accept, any charges for labor or material costs incurred for any installation, repair, service or replacement of the Products without the prior written consent of Seller.
- 5. SHIPMENT AND DELIVERY: Deliveries are made F.O.B. Seller's shipping point. Responsibility and risk of loss for damage shall pass from Seller to Buyer upon render to, and receipt by, a common carrier at Seller's shipping point. Buyer hereby expressly waives any claims for shortages or damages suffered in transit against Seller and hereby agrees that any such claims shall be submitted by Buyer directly and only to the Buyer's insurance carrier. While Seller will use commercially reasonable efforts to maintain the delivery date(s) acknowledged or quoted by Seller, all shipping dates are approximate and not guaranteed. Seller reserves the right to make partial shipments. Seller, at its sole option, shall not be bound to tender delivery of any Products for which Buyer has not provided shipping instructions. If the shipment of the Products is postponed or delayed by Buyer for any reason, Buyer agrees to reimburse Seller for any and all storage costs and other additional expenses resulting therefrom.
- 6. RETURN OF GOODS: Products cannot be returned without the prior written consent of Seller. A 25% restocking and handling charge will be applied to returned Products, other than those which are returned for warranty repair or replacement. Additional service charges will apply to any damaged Products for restoration to saleable condition.
- 7. <u>LIMITED WARRANTY</u>: <u>LIMITATION OF REMEDY AND LIABILITY</u>: Subject to the limitations on remedies and liabilities set forth below, Seller warrants that the Products manufactured by Seller will be free from defects in material or workmanship under normal use and regular service and maintenance for one (1) year from the date of sale by Seller to Buyer. Determination of the suitability or fitness of the Products from the use or purpose contemplated by Buyer is the sole responsibility of Buyer, and Seller shall have no responsibility in connection with such suitability. The warranty set forth in this paragraph is Seller's sole warranty with respect to the Products.

SELLER MAKES NO OTHER WARRANTY OF ANY KIND WHATSOEVER, EXPRESS OR IMPLIED, INCLUDING, WITHOUT LIMITATION, ANY WARRANTY AGAINST INFRINGEMENT OF ANY THIRD PARTY'S INTELLECTUAL PROPERTY RIGHTS; AND ALL IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE HEREBY DISCLAIMED BY SELLER AND EXCLUDED FROM THIS AGREEMENT.

Buyer agrees to examine and inspect the Products immediately upon arrival at their destination, and if the Products allegedly fail to comply with the limited warranty provided hereunder, Buyer shall give detailed written notice of such alleged failure/non-compliance to Seller within ten (10) days of its receipt of the Products. Any claim under this warranty shall conclusively be deemed waived by Buyer unless written notice thereof is given to Seller within ten (10) days after Buyer discovers, or should reasonably have discovered, the alleged failure/non-compliance of the Products, whichever is earlier. Buyer's exclusive remedy under this warranty is limited to the repair or replacement of the Products or the refund of the amount of the purchase price paid by Buyer, at Seller's sole option, upon the return of any nonconforming Products to Seller at Buyer's expense.

This limited warranty does not extend to any losses or damages due to misuse, accident, abuse, neglect, normal wear and tear, Buyer's negligence or intentional conduct, unauthorized modification or alteration, use beyond rated capacity, or improper installation, maintenance or application. To the extent that Seller has relied upon any specifications, information, representations of operating conditions or other data supplied by Buyer or its agents to Seller in connection with the design or manufacture of the Products, and in the event such specifications, information, representations or other data caused and/or contributed to the alleged failure/non-compliance of the Products, then any warranties contained herein shall be expressly waived by Buyer and be deemed null and void.

IT IS UNDERSTOOD AND AGREED THAT SELLER'S LIABILITY HEREUNDER OR IN CONNECTION WITH THE MANUFACTURE OR SALE OF THE PRODUCTS DESCRIBED HEREIN, WHETHER IN CONTRACT, IN TORT, FOR INFRINGEMENT, UNDER ANY WARRANTY, IN NEGLIGENCE OR OTHERWISE SHALL NOT EXCEED THE AMOUNT OF THE PURCHASE PRICE PAID BY BUYER. UNDER NO CIRCUMSTANCES SHALL SELLER BE LIABLE FOR SPECIAL, INCIDENTAL, INDIRECT OR CONSEQUENTIAL DAMAGES (INCLUDING, WITHOUT LIMITATION, ANY LOSS OF ANTICIPATED PROFITS INCURRED BY BUYER). THE PRICE STATED FOR THE PRODUCTS IS A CONSIDERATION IN LIMITING SELLER'S LIABILITY.

8. EXCUSE OF PERFORMANCE (FORCE MAJEURE): Seller shall not be liable for delays in performance or for non-performance due to acts of God; acts of Buyer; war; fire; terrorism or other criminal conduct; flood; weather; sabotage; strikes, or labor or civil disturbances; governmental requests, restrictions, laws, regulations, orders or actions; unavailability of or delays in materials, utilities or transportation; default of suppliers; or circumstances or any other events or causes beyond Seller's control. Deliveries or other performance may be suspended for an appropriate period of time or canceled by Seller upon notice to Buyer in the event of any of the foregoing, but the remainder of the Agreement shall otherwise remain unaffected as a result of the foregoing.

If Seller determines that its ability to supply the total demand for the Products, or to obtain material used directly or indirectly in the manufacture of the Products, is hindered, limited or made impracticable, Seller may allocate its available supply of the Products or such material (without obligation to acquire other supplies of any such Products or material) among its purchasers on such basis as Seller determines to be equitable without liability for any failure of performance which may result therefrom.

- 9. CANCELLATION: Buyer may cancel orders only upon reasonable advance written notice and consent of Seller. If Seller consents to such cancellation, Buyer must pay Seller its cancellation charges which include, among other things, all costs and expenses incurred to cover commitments made by Seller, and a reasonable profit thereon. Seller's determination of such termination charges shall be conclusive.
- 10. CHANGES: Buyer may request changes or additions to the Products consistent with Seller's specifications and criteria. In the event such changes or additions are accepted by Seller, Seller may revise the price(s) and date(s) of delivery.

Seller reserves the right to change designs and specifications for the Products without prior notice to Buyer, except with respect to Products being made-to-order for Buyer.

- 11. ASSIGNMENT: Buyer shall not assign its rights or delegate its duties hereunder or any interest therein or any rights hereunder without the prior written consent of Seller, and any such assignment, without such consent, shall be void.
- 12. INSTALLATION: Buyer shall be responsible for receiving, inspecting, testing, storing, installing, starting up, and maintaining all Products.
- 13. GENERAL PROVISIONS: These Terms and Conditions supersede all other communications, negotiations and prior oral or written statements regarding the subject matter of these Terms and Conditions. No change, modification, rescission, discharge, abandonment, or waiver of these Terms and Conditions shall be binding upon Seller unless made in writing and signed on its behalf by a duly authorized representative of Seller. No conditions, usage of trade, course of dealing or performance, understanding or agreement purporting to modify, vary, explain, reject, or supplement these Terms and Conditions shall be binding unless hereafter made in writing and signed by the party to be bound, and no modification shall be affected by Seller's receipt, acknowledgment, or acceptance of purchase orders, shipping instruction forms, or other documentation containing terms at variance with or in addition to those set forth herein. No waiver by either party with respect to any breach or default or of any right or remedy and no course of dealing, shall be deemed to constitute a continuing waiver of any other breach or default or of any other right or remedy, unless such waiver be expressed in writing and signed by the party to be bound. All typographical or clerical errors made by Seller in any quotation, acknowledgment or publication are subject to correction. In the event that any work, phrase, clause, sentence, or other provision hereof shall be deemed unenforceable by a court of law and/or equity, such finding shall not invalidate all other enforceable provisions hereof.

The validity, performance, and all other matters relating to the interpretation and effect of this Agreement shall be governed by the laws of the state of Missouri, without giving effect to its conflict of laws rules. The application of the United Nations Convention on Contracts for the International Sale of Goods and the United Nations Convention on the Limitation Period in the International Sale of Goods to this Agreement are expressly excluded. Buyer and Seller agree that the proper and only venue for all actions arising from, relating to or in connection with this sale shall be the County of St. Louis, State of Missouri, where Seller's place of business is situated, and the parties agree to submit to such jurisdiction.

Series 1100

Hager **IVES** McKinney **BEST** PBB Bommer Rixson ABH and more ACSI

2720 Clark Avenue St. Louis, MO 63103 (314) 652-5588 (314) 652-2090 FAX

Series 1100 | Electric Hinges/Pivots

ACSI Series 1100 Electric Hinges/Pivots are designed for doors that require concealed low voltage power transfer, concealed electric monitoring or concealed low voltage power transfer with monitoring. ACSI Series 1100 products are UL Listed and carry a full one-year warranty.

Manufacturers

Hager, IVES, McKinney, BEST, PBB, Bommer, Rixson, ABH, Dorma, Design Hardware, Don-Jo and more*

- *Consult factory for manufacturers not listed
- · All IVES electric hinges supplied with Allegion connectors
- · All McKinney electric hinges supplied with ASSA connectors

Options

- · Custom wire lead lengths
- · Universal Molex® Connectors
- · Connectors available in Hager, ASSA or IVES specification

Features

- · UL listed (UL File BP6073)
- · UL Fire Rating on steel and stainless electric hinges (UL File R22305)
- · Provide current transfer to electrified mortise or cylindrical locks, exit devices with electric latch retraction, electric strikes (pair of doors), & locks with monitoring/request to switches
- · UL Rated for 3.5 amp continuous and a 16amp pulse
- · Standard weight or heavy weight models
- Steel, brass, or stainless steel hinges
- · Available in five knuckle and three knuckle hinges
- · All architectural finishes in sizes 4x4 through 6x6
- · Hinges/Pivots in stock for same day shipments

Notes

- Electric hinge must be placed in the center position only.
- · ACSI requires NON-NRP hinges for modification. Hinge pin is not field removable after modification.
- · ACSI part #302-03-03 mortar guard is required for all application with grout-filled frames. Failure to install mortar guard will void the electric hinge warranty.
- All "specialty hinges" not previously modified by ACSI will include a onetime \$250 design/engineering fee plus the hinge modification price.

Mortise Keyswitches

ACSI Series 1310 Mortise Keyswitches are designed to control electric locks, electric strikes, electric exit devices and a variety of other control applications. The keyswitches allow keying the electrically controlled openings to facility master key systems. DPDT contacts unless otherwise noted.

Series 1300 | Door Controls

Emergency Release

ACSI 1330-3 Emergency Release provides manual emergency reporting; attractive/durable and finished in blue enamel.

Features

- UL Listed
- · California State Fire Marshall approved
- · Normally open or normally closed contacts
- · Key resettable for increased security
- · Designed for indoor or outdoor use
- · Mounts in a standard single gang box
- · Comes packaged with two spare keys, mounting hardware and one glass break tube

| Model | | Description | List Price |
|--------|-----------|-------------------|------------|
| 1330-3 | PEL SUBSI | Emergency Release | \$288 |

Door Position Sensors

ACSI Series 1335 Door Position Sensors are used to confirm door position. Magnetic sensors mounted in the frame react to the proximity of the magnet mounted in the door. Pneumatic models also available for use in hazardous locations.

| Model | | Description | List Price |
|--------|--------|--|------------|
| 1335-1 | | DPS Standard mortise, SPDT, NO/NC contacts | \$168 |
| 1335-2 | | DPS ANSI, SPDT, NO/NC contacts | \$190 |

| 1341-1 | 2 | Narrow style, LED (Red or Green), 1 ½" frame mount | \$72 |
| 1341-2 | • | Narrow style, 2 LEDs (Red & Green), 1 ½" frame mount | \$120 |

Electrical Specifications

1310/1320 Switches

· Contacts Rated 1A @ 30VDC

1330-3 Emergency Release Switch

- · Separate NO/NC Outputs
- · Can be wired for SPDT Contact Configuration
- · Contacts Rated 1A @ 30VDC

1340-2 & 1340-3 Audible Alarm

- · DC Voltage Range: 4V 28V
- · DC Current Range: 3mA 16mA
- Frequency: 2900 Hz
- · Sound Intensity: 64dB @ Min.V; 76dB @ Max.V

Red/Green LED Indicator used with 1310/1320/1340 Controls

· 20mA @ 24VDC

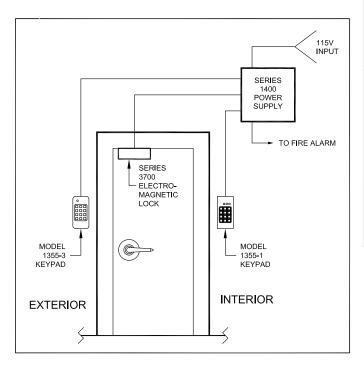

Series 1300 | Door Controls

Digital Keypads

ACSI Series 1355 Digital Keypads offer proven reliability for commercial, industrial and residential applications. The keypads are designed to control any electric locking device.

Features

- · Keypad programmable
- · 10-30 VDC; 12-24VAC-auto adjusting (12-24VAC/DC for 1355-5)
- · 120 user capability
- · Codes can be 1 to 6 digits including repeated digits
- · 1-90 sec. adjustable relock delay (1-255 sec. for 1355-6)
- · LED status indicators (for all models except 1355-4)
- · Request-to-exit switch input
- Main relay ON/OFF latching (toggle mode)
- · Panic output (for all models except 1355-5 and 1355-6)
- · Remote alarm panel interface capability
- · Main relay: 5A, form C @ 24VDC with 10A surge (2A for 1355-3, 1355-4 and 1355-6)
- · Non-volatile memory remembers codes and instructions when power is removed

| Model | | Description | List Price |
|--------|------|---|------------|
| 1355-1 | | Digital Indoor Keypad | \$264 |
| 1355-2 | 19-5 | Weather Resistant Keypad | \$384 |
| 1355-3 | | Sealed Environmental Keypad Weather resistant, self-contained metal housing Vandal resistant Small design suitable for commercial, industrial and residential applications | \$816 |

| 1355-6 | | Indoor/Outdoor Backlit Keypad • Weather resistant • Illuminated backlit hardened keys • Flush mount design • Includes audible indicator (sounder) | \$540 |
| 1355-7 | | Harsh Environment Keypad · Vandal and weather resistant case · Indoor/outdoor applications · Touch sensitive flat key design · 12/24 volts AC/DC jumper selectable | \$1,032 |

Series 1400

Power Supplies

2720 Clark Avenue St. Louis, MO 63103 (314) 652-5588 (314) 652-2090 FAX

1406/1426 Power Supplies

ACSI 1406 and 1426 Power Supplies are designed to operate exit devices equipped with ACSI Series 1550 Electric Latch Retraction (required with 1550 Electric Solenoid Latch Retraction).

Features

- · UL Listed and tested to UL 294 standard
- · Class 2 rated outputs
- · 2A load capacity
- $\boldsymbol{\cdot}$ Overload, over voltage, and short circuit protection
- 1406 Series only: select from independent control of single exit devices from separate inputs (one or two single doors) or sequential operation of two exit devices from a single input (pair of doors)
- · Automatic door operator interface
- · Fire alarm interface
- · Field adjustable latch retraction time delay
- 24VDC, 12VDC* constant voltage outputs (250mA each)
- *Not available in battery backup models

Day/Night Mode-ACSI 1426 Power Supply

Provides a separate input for retracting one exit device or two exit devices sequentially without activating the automatic door operator. While the latches are held retracted, the auto-operator can be activated independently from a different input.

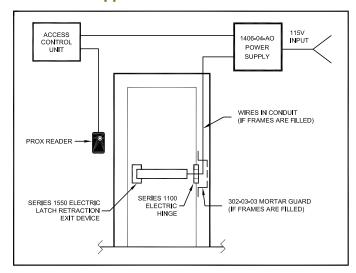

1406BB/1426BB Power Supplies with Battery Backup

All the same features as above, but includes built-in battery backup power:

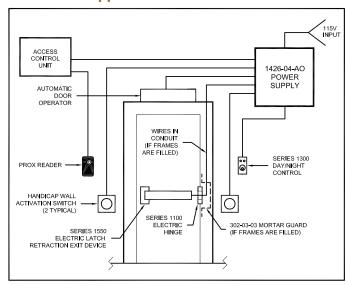

- 4 hours of backup power at full load during AC power failure
- Standby battery power with a supervised AC failure output and low battery output
- · Supplied with (2) 12V, 7Ah lead acid batteries

| Model | Description | List Price |
|--------|--|------------|
| 1406 | 1550 electric latch retraction | \$690 |
| 1426 | 1550 electric latch retraction, day/night mode | \$700 |
| 1406BB | 1406, battery backup | \$1,180 |
| 1426BB | 1426, battery backup | \$1,200 |

ACSI 1406 Application

ACSI 1426 Application

1410 Interlock Power Supply

ACSI 1410 Interlock Power Supply is designed to interconnect two or more doors using fail safe locking devices. Each supply can control up to four doors and the system can be expanded for requirements in excess of four doors. Any one door can be programmed to be a part of (common to) as many as three separate interlocking systems. Separate plug-in p.c. boards used to control interlocking doors can be programmed for normally locked or normally unlocked operation.

Inputs are available for fire alarm and optional emergency release interface for override of the interlocking system. Applications include darkrooms, laboratories, pharmaceuticals, detention centers, money counting rooms, airlocks, clean rooms, etc.

ACSI system engineers are available for design and consultation services to coordinate all aspects of the system. ACSI electric locking systems and all documentation including riser diagrams and point-to-point wiring diagrams can give distributors a single source for their system requirements.

Features

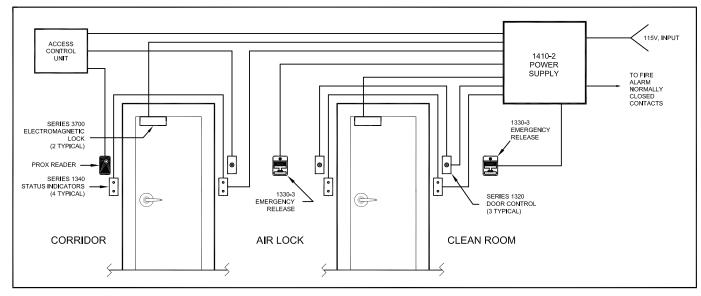

- · UL Listed and tested to UL 294 standard
- · Filtered/Regulated 24VDC
- · Class 2 rated outputs
- · 2.2A load capacity
- · Overload, over voltage, and short circuit protection
- · Automatically accepts 120VAC or 240VAC input

| Model | Description | List Price |
|--------|------------------|------------|
| 1410-2 | 2 Door Interlock | \$980 |
| 1410-3 | 3 Door Interlock | \$1,300 |
| 1410-4 | 4 Door Interlock | \$1,500 |

1410-4

ACSI Interlock System

www.acsi-inc.com

1420 Power Supply

ACSI 1420 Power Supply can be used in the following applications:

- Provide power/control to exit devices equipped with the ACSI Series 1550-MD Motor Drive Electric Latch Retraction. (See ACSI Series 1500 Electric Exit Device Catalog)
- · Provide power/control to electrified door hardware in applications requiring automatic door operator interface.

Features

- · UL Listed and tested to UL 294 standard
- · Filtered/Regulated 24VDC
- · Class 2 rated outputs
- · 2A load capacity
- Overload, over voltage, and short circuit protection
- · Automatically accepts 120VAC or 240VAC input

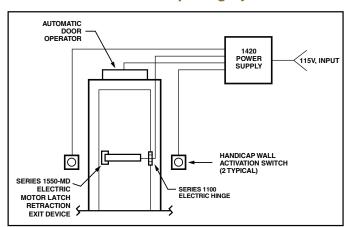

Each 1420 Includes

- · Separate inputs for activation switch on entry and exit sides of the opening.
- Relay dry contact output to automatic door operator input.
- · Built-in 0.5 second time delay between activation of the electrified door hardware and automatic door operator.
- · Input for optional fire alarm or emergency release switch when urgent unlocking of door is required.
- · Auxiliary 24VDC constant voltage output
- · Separate 24VDC outputs for fail safe and fail secure electrified door hardware.

Options

DN - Day/Night mode provides a separate input for retracting one exit device or two exit devices simultaneously without activating the automatic door operator. While the latches are held retracted, the auto-operator can be activated independently from a different input.

ACSI Automated Door Opening System

1420

| Model | Description | List Price |

1440 Power Supply

ACSI 1440 Power Supply provides power for fail safe or fail secure locking devices.

Features

- · UL Listed and tested to UL 294 standard
- Filtered/Regulated 24VDC
- · Class 2 rated outputs
- · 2A load capacity
- · Overload, over voltage, and short circuit protection
- · Surge suppression on fail safe and fail secure outputs
- · Automatically accepts 120VAC or 240VAC input

Each 1440 Includes

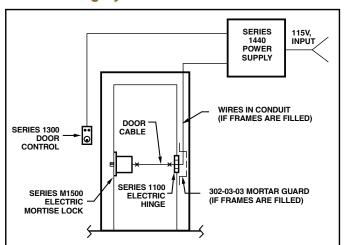

- Interface relay to isolate the locking device current from the control switch
- Auxiliary 24VDC constant voltage for powering standalone devices such as keypads, motion detectors, status indicators, etc.
- Field terminal block set at 45° for ease of installation

Options

TD - Adjustable time delay for 1 second to 60 minutes

| Model | Description | List Price |
|---------|-----------------------------|------------|
| 1440 | 24VDC, 2A | \$420 |
| 1440-TD | 1440, adjustable time delay | \$510 |

23

1451/1452 Power Supplies with Battery Backup

ACSI 1451 and 1452 Power Supplies can be used in the following applications:

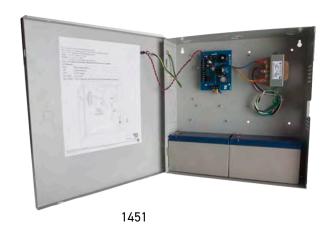

- Provide power/control to exit devices equipped with the ACSI Series 1550-MD Motor Drive Electric Latch Retraction. (See ACSI Series 1500 Electric Exit Device Catalog)
- · Provide power/control to electrified door hardware in applications requiring automatic door operator interface.
- · Provide power for fail safe or fail secure locking devices.

Features

- · 1451-1A load capacity
- · 1452-1.75A load capacity
- · UL Listed for US and Canada
- · Filtered/Regulated 12VDC or 24VDC
- · Class 2 rated outputs
- · Fire alarm interface
- · Overload and short circuit protection
- · Automatic switchover to standby battery when AC fails
- · Built-in battery charger
- · Supplied with (2) 12V, 7Ah lead acid batteries

Options

- TD Adjustable time delay for 1 second to 60 minutes
- DN Day/Night mode provides a separate input for retracting one exit device or two exit devices simultaneously without activating the automatic door operator. While the latches are held retracted, the auto operator can be activated independently from a different input.
- · AO Automatic Operator Interface

1452

| Model | Description | List Price |

1490 Delayed Egress Power Supply

ACSI 1490 Power Supply is designed to interface with ACSI electromagnetic locks in a delayed egress locking application.

Features

- UL Listed
- · Compliance with NFPA code requirements
- · Filtered/Unregulated 24VDC
- · 2A load capacity
- · Input for delayed egress activation
- Manual reset of delayed egress alarm
- · Optional auto reset available
- · Fire alarm interface
- · Output for audible alarm
- Field adjustable delay for nuisance alarm, door release, request-to-exit and auto reset delay times
- One power supply can provide up to 4 delayed egress alarm zones

Description of System Operation

The delayed egress alarm becomes activated when the push bar of the Series 1500 modified exit device is depressed. A concealed AE (request-to-exit) switch initiates an irreversible cycle that begins with the Series 1300 audible alarm sounding for a predetermined time (field adjustable) while the Series 3700 electromagnetic lock remains energized locking the door.

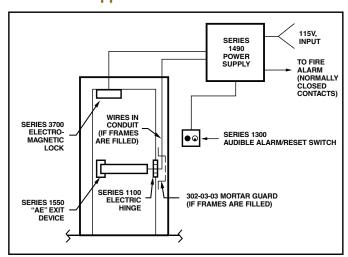

At the end of the timing cycle, the electromagnetic lock de-energizes and unlocks the door while the audible alarm continues sounding. The door will remain unlocked and in an alarm state until manually reset by the Series 1300 keyswitch. Resetting the system will lock the door by energizing the electromagnetic lock and will turn off the audible alarm.

Note: When using the system with a door position switch, the door must be fully closed prior to resetting the system. Resetting with the door open will energize the electromagnetic lock, but will not turn off the audible alarm. The audible alarm will also begin sounding if a forced entry occurs while the system is armed.

In the event of a fire alarm, the electromagnetic lock will immediately de-energize to unlock the door. Upon resetting the fire alarm, the system will return to normal standby operation.

Series 1400 Power Supply Specifications

ACSI Series 1400 Power Supplies are designed and manufactured by ACSI engineers to operate a variety of electric locking devices that will meet the most sophisticated specifications.

ACSI system engineers are available to assist you in the selection of the power supply that best meets your application. All ACSI designed systems include riser diagrams and point-to-point wiring diagrams that allow ease of interface with life-safety and security systems.

You supply the exit device and ACSI supplies high quality UL Listed modifications to a wide range of manufacturers' exit devices. ACSI engineers and technicians are available to provide system design, wiring diagrams, and a variety of technical services.

1550-MD Electric Motor Latch Retraction

ACSI Series 1550-MD Electric Motor Latch Retraction modification/kit provides a remote means of locking or unlocking exit devices.

- · Simultaneous electric latch retraction and dogging (push bar depressed)
- UL Listed for both panic and fire exit hardware
- · Available for mortise, rim, concealed and surface vertical rod exit devices
- · Field or factory installed
- Quiet operation
- · Continuous duty rated
- Low power consumption
- · 24VDC operation
 - -ACSI Series 1400 power supplies recommended
- · Interface with life-safety systems
- · Non-polarized leads
- · On-board diagnostic LEDs
- Automatic retry

1560/1570 Electric Trim Control

ACSI Series 1560/1570 Electric Trim Control modification provides a remote means of locking or unlocking outside lever handle trims of exit devices.

- · Fail Safe (Power Lock)
- Outside trim is locked when power is applied and unlocked when power is removed. Trim control will unlock in the event of a power failure.
- Fail Secure (Power Unlock)
 - Outside trim is unlocked when power is applied and locked when power is removed. Trim control will lock in the event of a power failure.
- · Continuous duty rated
- · Low power consumption
- · 24VDC, 24VAC, 12VDC, or 12VAC operation
 - ACSI Series 1400 power supplies recommended
- · Interface with life-safety systems

1570-996L-24VAC/DC

1510/1520 Electric Mortise Exit Control

ACSI Series 1510/1520 Electric Mortise Exit Control modification provides a remote means of locking or unlocking mortise exit devices.

- UL Listed
- · Fail Safe (Power Lock)
- Outside trim is locked when power is applied and unlocked when power is removed. Lockset will unlock in the event of a power failure.
- Fail Secure (Power Unlock)
 - Outside trim is unlocked when power is applied and locked when power is removed. Lockset will lock in the event of a power failure.
- · Continuous duty rated
- · Low power consumption
- · 24VDC, 24VAC, 12VDC, or 12VAC operation
- ACSI Series 1400 power supplies recommended
- · Interface with life-safety systems

Exit Device Switch Kits

ACSI Series K Switch Kits are field installed in exit devices. Series K Switch Kits include a SPDT (Single Pole Double Throw) switch assembly with long wire leads and easy-to-follow installation instructions. K Switch Kits may be used to:

- Provide instant release of magnetic locks for free egress
- · Activate a door alarm
- · Signal a control console when the push bar of an exit device is depressed
- · Shunt a door alarm to allow free egress

Series 1500 | Electric Locks

ACSI supplies high quality UL Listed modifications to a wide range of manufacturers' locksets. Series 1500 electric locks provide safety and security for stairtower doors or controlled areas where both locking and latching are required. The Series 1500 locks allow remote electric locking or unlocking and/or motorized latch retraction while conforming to life-safety codes. Series 1500 locks are available in motor-controlled or solenoid-controlled in both mortise and cylindrical locks. Consult factory for solenoid-controlled locks.

Features

- UL Listed
- · California State Fire Marshall approved
- · Fail Safe (Power Lock)
 - Outside trim is locked when power is applied and unlocked when power is removed (storeroom function when energized). Lockset will unlock in the event of a power failure (passage function).
- Fail Secure (Power Unlock)
 - Outside trim is unlocked when power is applied and locked when power is removed. Lockset will lock in the event of a power failure.
- 1500MLR-Motor Drive Latch Retraction
 - Outside trim (or both outside and inside trim depending on the lock function) is locked. The main latch bolt is retracted when power is applied. The main latch bolt is extended in the event of a power failure.
- Simple user selectable fail safe/fail secure operation in motor-controlled locks
- Continuous duty rated
- · Low power consumption
- · 24VDC, 24VAC, 12VDC or 12VAC operation
- When key cylinders are provided in the locks, the latch bolt may be momentarily retracted with key even though electrically locked.

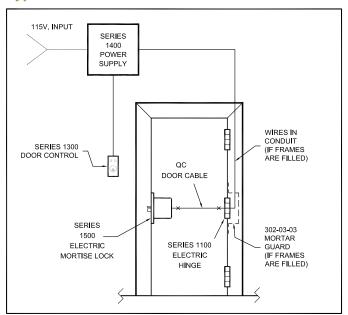

Note: Locks that are electrically unlocked may not be locked via the key cylinder.

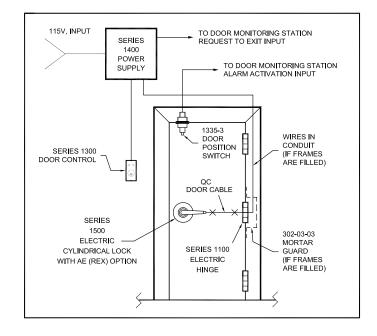

- · Wide variety of monitoring options are available
- · Interface with life-safety systems

Applications

Doors in stairtowers, offices, classrooms, interlocks, elevator lobbies, laboratories, computer rooms, cashier stations, hospital equipment rooms, pharmaceutical storage rooms

Electric Mortise Lock Bodies

ACSI Stocks Electric Mortise Lock Bodies available in Schlage, Corbin Russwin, Sargent, Yale, BEST and Falcon are available as motor-controlled. Motor-controlled locks are field selectable for fail safe or fail secure and have automatic 12V or 24V, AC or DC operation. ACSI 1500MLR motorized latch retraction is available in Schlage L9070B and also available in 1520MLR, 1510MLR for dual latch retraction and lock/unlock features. A variety of monitoring options are available. Consult factory for solenoid-controlled locks.

Series 3700 | Electromagnetic Locks

ACSI Series 3700 UL Listed Electromagnetic Locks combine high security features with fail safe operation and conform with life-safety codes. The Series 3700 is designed for single or pairs of outswing or inswing doors.

Features

- · UL Listed
- · Variety of models available
- · Positive fail safe security
- · No moving parts maintenance free
- · Low power consumption
- · Built-in surge and spike protection
- · Built-in door position sensor

Options

- Magnetic bond sensor
- · Power LED
- · Custom length housings
- · Variety of architectural finishes
- · Glass door brackets

Electrical Specifications

Series 6100

Communicating Bath Door System

2720 Clark Avenue St. Louis, MO 63103 (314) 652-5588 (314) 652-2090 FAX

Series 6100 | Communicating Bath Door System

ACSI Series 6100 Communicating Bath Door System is designed to coordinate access to a common bathroom facility from adjoining rooms. This system allows more efficient utilization of floor space in facilities by eliminating the need for a bathroom in each room.

Features

- Fail safe system doors will unlock when power is removed
- · Free egress at all times
- User privacy
- Eliminates accidental lock-out from either room to the bathroom
- Mechanical key override allows personnel to enter during an emergency
- · 2A load capacity
- Inputs available for optional emergency release switch when urgent unlocking of the door is required
- · Convenient field wiring of system components

Options

· Located above outside doors for emergency release:

| Model | Description | List Price |
|--------------|---|------------|
| 1330-3 | Emergency Release | \$288 |
| 1320-1MOM-ER | Pushbutton Switch marked "Emergency Release" | \$140 |

| Model | Description | List Price |
|-------|--------------------------------|------------|
| 6100 | Communication Bath Door System | \$1,130 |

Included Components

| Qty | Description |
|--------|--|
| 1 Each | 1400-6100 Power Supply |
| 2 Each | Door Position Sensors |
| 2 Each | Pushbuttons with indicator marked "Push to Lock" |
| 2 Each | Indicators marked "Occupied" |

Required Components

| Qty | Description |
|--------|---------------------------------|
| 2 Each | Electric Hinges, Model 1104* |
| 2 Each | M1510 or C1510 Fail Safe Locks* |

*Electric hinges and electric locks are not included, but must be ordered seperately with the Series 6100 system.

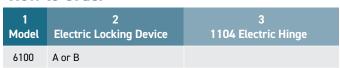

Description of System Function

When the bathroom is not occupied, both doors are unlocked and all indicators are extinguished. Upon entering the bathroom from one of the rooms, the occupant depresses the inside pushbutton switch to lock both doors (both doors must be closed in order for them to lock). When the doors lock, the red indicators inside the bathroom indicate that both doors are locked from the outside. The green indicators outside the bathroom indicate that the bathroom is occupied.

Note: Both doors are always free egress and can be unlocked mechanically from the outside with a key. When the occupant exits either door, both doors automatically return to the unlocked condition and all indicators are extinguished.

3. 1104 Electric Hinges

Please specify manufacturer, weight, size and finish of the hinge required. (2) Hager BB1279 4.5x4.5 26D 1104

(2) BEST FBB191 5.0x4.5 10B 1104

Note: System may also be furnished with an emergency release device; i.e., 1330-3 Emergency Release or 1320-1 Pushbutton Switch.

Series 8500

Gemini Locking Systems

2720 Clark Avenue St. Louis, MO 63103 (314) 652-5588 (314) 652-2090 FAX

Series 8500 | Gemini Locking Systems

ACSI Series 8500 Gemini Locking System provides safety and security for stairtower doors or controlled areas where both locking and latching are required. The Gemini system allows remote electric locking or unlocking while conforming to life-safety codes. The system consists of two components: a Gemini modified mortise lockset and a frame mounted Gemini operator.

Features

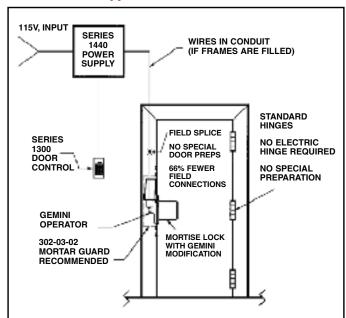

- UL Listed Gemini mortise lock no special door prep
- UL Listed Gemini operator located in the frame
- Ability to work with a wide range of mortise lock manufacturers:
 - Arrow
 - Corbin Russwin
 - Schlage
- · Fail Safe (Power Lock)
 - Outside trim is locked when power is applied and unlocked when power is removed (storeroom function when energized). Lockset will unlock in the event of a power failure (passage function).
- · Fail Secure (Power Unlock)
 - Outside trim is unlocked when power is applied and locked when power is removed. Lockset will lock in the event of a power failure.
- · 24VDC or 24VAC/DC
- · Optional quick connect cable
- · Continuous duty rated
- · Heavy-duty stainless steel housing
- · Security monitoring available
- · Interface with life-safety systems

- Mechanical key override
 - When key cylinders are provided in the locks, the latch bolt may be momentarily retracted with key even though electrically locked.

Note: Locks that are electrically unlocked may not be locked via the key cylinder.

• Easy installation: Gemini operator fits easily into 2" face frames. Only one wiring termination.
